

“Don’t Call Us, We’ll Call You!”

RKA is proud to announce our new **Fuel Management Program**. RKA/FMP is a device that installs on your above-ground storage tank that will be responsible for submitting data regarding your gallon information back to our corporate headquarters.

The RKA Fuel Management Program will ensure you will never be without fuel again.

Through this program, RKA will be able to reduce the number of deliveries made to your site, meaning there will be fewer phone calls, invoices, and less paperwork to deal with.

Additionally, you won’t have to worry about “sticking” your tank ever again!

At RKA Petroleum Companies, quality and service are priority one. Our new Fuel Management Program is structured to ensure you always have an adequate amount of product in your tank—always!

With the RKA/FMP program, RKA is keeping track of your gallons each and every day from our headquarters, saving you time *and* money! The RKA Fuel Management Program is a technologically enabled utility that helps fuel your bottom line.

Keep in touch with market prices with RKA Petroleum’s On-Line Pricing Application. Ask an RKA Commercial Account Executive today about how you can view daily prices and order fuel on-line!

We work hard to provide our customers “peace of mind” knowing they will never be without assistance.
